Length: 12m

Beam: 3,65m

Engines: 2x450 Hp

Displacement:

Propulsion: 2 x waterjet or
sterndrive

Speed: + 40kn

STGS CONSULTING

The X 1200 is a multi-purpose platform constructed for an efficient series production as well as for one - off production, extensible in length and width together with a variety of superstructures to meet many kinds of custom fitted configurations. Here as a Pleasure model, all models are made of marine grade aluminum. High speed crafts combined with waterjet gives outstanding maneuverability and shallow draft capability.
